This is a comprehensive study of Africa country by country providing concise information on history, government, political systems, economic models and social developments with the latest facts and figures.

It is a modern reference work or compendium holding a current and comprehensive summary of information from all branches of knowledge on any given African country.

It is developed, researched and documented specifically to cater for the needs of those in quest for a brief analysis on African countries without having to dwell too much on irrelevant information. Its aim is to provide a comprehensive, scholarly, and critical guide to the 54 sovereign African states.
